1. Applicant's election without traverse of Group II and the peptide IMIGVLVGV in the paper filed 12/2/2003 is acknowledged.

2. Claims 42,44-48,51-64,80-167 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in paper filed 12/3/2003.

3. The amendment filed 12/2/2003 has necessitated the following additional species election requirement.

4. This application contains claims directed to the following patentably distinct species of the claimed invention.

The peptide of claim 43 or 49 or 50. These peptides have distinct lengths and different sequences.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

5. This application contains claims directed to the following patentably distinct species of the claimed invention.

- a) a peptide fused to a T helper peptide
- b) a peptide/ liposome
- c) a lipidized peptide
- d) a peptide fused to a linker
- e) a peptide fused to a carrier
- f) a peptide fusion peptide
- g) a peptide homopolymer
- h) a peptide heteropolymer

These molecules are functionally distinct and contain molecules that are chemically distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron Schwadron, Ph.D. whose telephone number is 571 272-0851.
